

Invoice submission guidelines:

India

Cognizant's Accounts Payable department is responsible for the timely processing of supplier invoices issued against approved purchase orders. Upon shipment of products, or services performed as requested on the official purchase order, the supplier is required to submit all corresponding invoices in a timely manner directly to Accounts Payable (within 7 business days from shipment or service completion) as instructed on the purchase order. In order to be processed by Accounts Payable, the supplier invoice must reference the same supplier information contained on the purchase order, a unique invoice number, the invoice date, and the appropriate Cognizant purchase order number.

Determining the Invoice receipt date

Within Cognizant's CAPPs system (ARIBA), payment terms are established for each supplier. Invoices processed by Accounts Payable will reflect those terms and the payment due date will automatically be calculated by the system if the invoice matches to the order placed. Accounts Payable does not designate a payment date as this is entirely system driven. **Accounts Payable does not designate a payment date if the invoice matches to the Purchase Order as this is entirely system driven.** For example, a supplier invoice dated July 1, 2017 is received by Accounts Payable on July 9 and is entered into CAPPs/Ariba system on July 10. If the payment terms are "Net 30", the system will automatically calculate a payment due date of August 8, 2017 for all accepted and undisputed transactions. Else the disputed invoice will be rejected and parked for clarification and the due date for payment will start from the date of invoice rectified or from the date of receipt of revised acceptable invoice by Accounts Payable.
